

SEAT BELT TOTE

In this class we will work with SEAT BELT WEBBING. It is relative easy to work with a few extra precautions. This is standard seat belt webbing and is very dense and strong (break strength is 6,000lb. So you do not want to be stitching over other stitches a lot. I used: CHRISTMAS IN BLOOM CORNER, G4463 (5.86"X5.90") from EMBLIBRARY.COM . And then added the Season's Greeting that I had on hand. If you would like to use a different design that is fine, but you will want to use a design that dose not have a lot of shading or heavy stitching.

If you want to do something in a different color you welcome to purchase you own seat belting. Ebay, and Craftsby, are the 2 places I have found it, Amazon sometimes has. You will need to be sure that it is 5 Bar and a full 2" wide, or it will NOT fit this pattern I this is your bag, so I want you to make what you want I will give you the basic pattern, and instruction, and several options you might like. We will go over zipper pockets, divided pickets and inside Side pockets.

SUPPLIES NEEDED

- Design up tp 7"X7"
