

3-D Printing

Explore the engineering design process and create 3-D printed models of original designs in this new STEM camp using Printrbot 3-D printers and TynkerCad/Cura software. Campers will start the week with the task of conceiving of a design idea using simple shapes, model the design in paper and cardboard, create a scaled down version of the design in Tynker CAD and 3-D print their miniatures. By the end of the week, campers will be creating original designs in Tynker CAD and 3-D printing their prototypes.

American Girl Stay-cation!

Grab your dolls, backpacks, and water bottles! You and your favorite doll will love this camp. Join us as we take our dolls on a stay-cation! We will be doing a little bit of outdoor camping, splish n' splashing, nature loving, kitchen mixing, and birthday celebrating! Bring your doll to camp each day so she can join in the fun! We will be enjoying crafts and activities themed around our stay-cation. This will be our 6th year of this great camp offered by LCDS lower school art teacher Renee Edmonston.

Animals Everywhere

From scales to wings and everything in between, come to the fun-filled week of learning about amazing animals of the world. We will cover different types and habitats each day about our animal friends. In addition to a different animal theme (Farm, Forest, Jungle, Pet, Ocean) each day, camp mornings will include engaging activities in these areas: Literature, Math, Art, Science, and, of course, a little free time to "monkey around" on our playground. Campers will bring their own morning snack and drink. Lunch Bunch available from 12:00p - 1:00p (optional). Register separately under Extended Day: Lunch Bunch for PKK.

Chess Camp

Mr. Mac's Knights is a private chess program that has been offered in LCDS' Summer Programs for the past six years by Lenwood McDougal, "Mr. Mac". The program is designed to teach the fundamental aspects of chess. It is based on the comprehensive chess curriculum written by Albert Lambert GM for beginners, intermediate, and advanced players. Young players will learn to problem-solve in various situations and practice sportsmanship. It also helps to build concentration and memory skills, improve overall math skills, and enables young players to become critical thinkers in the classroom. Some of what participants will learn: Beginners will learn how the pieces move, capture, checkmate, castling, and how to open a game (do's and don'ts). Intermediate and Advanced players will learn tactics and strategies, defense, trades, typical mating combinations and other tactics, such as pinning, skewers, forks, and discoveries.

Cooking Lab I

Do you like science? Do you like to cook? If so, Cooking Lab is for you! Explore the science of cooking as you learn basic cooking skills. Experiment with different ingredients and test recipes. Visit a local farm and learn how to cook with fresh produce.

Compete against your fellow campers in cooking challenges. Each camper will keep a cooking journal with recipes, tips and notes.

The MS Science Lab will be transformed into a Cooking Lab with a butane burner and kitchen tools at each station. Please note:

Cooking Lab II ingredients include wheat, eggs, dairy, nuts, and fruit.

Drone Exploration: Fly Create Innovate

Did You Know: Drones deliver medical supplies to persons in need? Drones deliver burritos to college students and pizza to families? Drones are deployed and drop lifebuoys to swimmers during a rescue? The landscape is wide open and there is no better time than now to allow your imagination to run wild. This program will open the creative minds of participants as they learn all about some of the most fascinating drone solutions to date. Teams will first learn about some of the incredible problems drone technology has solved; and then have the opportunity to interact with inventors currently in the drone industry via video conference. Upon building a base of knowledge, experience, and confidence, participants will then fly and code drones as they work together in teams to create their own business, environmental, or safety drone solution. Instructors will challenge teams to focus on the social and ethical responsibilities that accompany the powerful and evolving drone technological advances. Each participant receives their own Drobots Flight Book™. No drone flying experience necessary. Participants are organized into age-appropriate groups.

EventCd	Teacher	StartDate	EndDate	Ages	StartTime	EndTime	Fee*

Drone Flying: Search & Rescue

Drone search and rescue is a necessity for first responders around the world, adding a new layer of solutions to save lives across the globe. Now you too can take part in and learn from simulated missions during this action-packed and creative program. Participants will learn how to fly and code drones while relying on their rescue team to utilize unique vantage points over specific areas on campus to locate victims and safely rescue them to safety. Teams will also learn invaluable lessons on how to quickly and accurately acquire aerial data that, in return, will enable them to make informed and targeted decisions for real-world positive applications. Drone safety and the social responsibilities of flying drones are included in this program. Each participant receives their own Drobots Flight Book™. No drone flying experience necessary. Participants are organized into age-appropriate groups. Where Technology Meets Fresh Air™.

Drone Ultimate Games: Speed Skill & Acrobatics

We check all of the boxes of STEM drone education during this action-packed program. Teams transition from the simulator to the remote control and enjoy a multitude of thrilling challenges on and off the ground! Get ready for a week of friendly competition as you and your team take to the sky and attempt to win the badge of the Ultimate Drone Games champion. Participants will experience the thrill of today's latest drone technology including drones equipped with mini nerf cannons and mini grabbers. It's all about the grand finale as teams conquer challenges and earn points for the end-of-program event: Ultimate Drobot Games. Drone safety and the social responsibilities of flying drones are included in this program. Important Notes For Campers: No drone flying experience necessary. Each participant receives their own Drobots Flight Book™. Participants are organized into age-appropriate groups.

Extended Day: Lunch Bunch for PKK

Any Pre-K / Kindergarten morning camp can be extended an extra hour to eat lunch at camp and engage in recess with friends from 12:00p - 1:00p. Campers must bring their own lunch and drink. Pick-up at 1:00p. Prepaid weekly fee is \$40/week. Daily and/or drop-in fee is \$10 for the extra hour. Lunch: 12:00p-12:30p; Recess: 12:30p-1:00p; Pick up: 1:00 pm.

Extended Day: AM

Extended mornings from 7:45 am to 8:45 am are available for families who wish to drop off before 8:45 am. Campers engage in free play with games and toys and coloring and drawing supplies. The prepaid fee for the week is \$40.00/week. The daily and drop-in rate is \$10/hour.

Extended Day: PM

Extended Day afternoon hours are available from 3:30p to 6:00p. Campers will engage in self-directed and group-directed activities to both indoor and outdoor play. Please send an afternoon snack and drink for your child. The prepaid weekly fee is \$100.00/week. The daily and/or drop-in rate is \$25/day.

Fashion & Machine Sewing

Welcome to the wonderful world of Machine Sewing! Whether you have are a budding fashionista that craves to make her own trendy dress or a crafty kid interested in learning how to create a purple unicorn, then our camp may be just the thing! The Handwork Studio knows that at this age it is all about choice. With a plethora of on trend sewing patterns to choose from and bolts and bolts of tempting fabric, every camper will have ownership in what they choose to make in our Fashion Machine Sewing program. Our patient and skilled counselors work with campers of all abilities. Counselors will work with all campers to ensure that they are being taught the necessary and appropriate skills. Skills range from learning how to use the sewing machine to measuring, pinning, cutting and then putting patterns together. Sessions run weekly, but there are enough pattern options, fun, and skill-building that campers can keep coming back week after week!

Fencing Sports Academy Camp

Fencing -- the Life-long Journey: June 26-30 Beginners; July 17-21 Beginners; July 24-28 Intermediate. Questions? Talk to Connie Schreiber at 888.300.5095 about fencing! Check out our website: fencingsports.net * * * Have you or your child watched Star Wars or the Summer Olympics? Ever wonder about the fencing you saw? The Fencing Sports Academy is excited to offer summer camps, the perfect way to enter the exciting world of fencing! The Fencing Sports Academy pairs a friendly, encouraging environment with the expertise of professional coaches, bringing out the best in our athletes. When entering our facility, you're greeted by the metallic ring of the fencing swords striking and the laughter of happy students. You'll see our coaches interacting with students, providing knowledge, insight, and encouragement. Fencing is a physically active, mentally engaging, strategic-skill sharpening sport! Our coaches will teach you the basics - advance, retreat, lunge! They'll also help you suit up in protective layers and a sturdy mask to get you ready to face your first competitor. We hope you'll score the first point! Our experienced coaches will help you prepare yourself physically and mentally for success on and off the piste! Who are our campers? Some tried other sports before picking up the sword, for others this is their first athletic endeavor. The children are active, enjoying the physical and mental vigor of the sport. Win or lose, they go home after their last bout of the day ready to return for more! New fencers gain basic knowledge of the sport. Experienced campers improve their strategy, physical conditioning, and technique. Introducing sports psychology techniques helps in managing emotions and succeeding on the fencing strip and away from it. Many of our campers find the summer is the beginning of a lifelong love of the sport. Friendships last into college and beyond. Campers won National Championships, earned college scholarships, and learned skills that will last.

Jump into Kindergarten!

Our fun, fantastic half-day camp for your rising Kindergartener will introduce your child to the amazing alphabet, reading readiness, stellar story time, marvelous math, and super cool science! We will also refine our culinary skills with special cooking projects during this week of hands-on activities designed to help your child transition to Kindergarten. Snack, drinks, and supplies will be provided. Lunch Bunch available from 12:00p - 1:00p (optional). Register separately under Extended Day: Lunch Bunch for PKK.

Jump Into LCDS First Grade!

Let's get ready for first grade at LCDS! We will play math and reading games, and work on literacy and comprehension activities. After we talk about the book we are reading, we will do a craft that goes along with the book! We will also focus on fine motor activities and practice our best handwriting.

EventCd	Teacher	StartDate	EndDate	Ages	StartTime	EndTime	Fee*

LEGO® Jedi Engineering

Young Jedi will explore worlds far, far away and engineering principles right in front of them. Defeat the Empire by designing and refining LEGO® X-Wings, R2-units, and settlements on far-flung edges of the galaxy. Imagination and engineering combine to create motorized and architectural projects such as energy catapults, shield generators and defense turrets.

EventCd	Teacher	StartDate	EndDate	Ages	StartTime	EndTime	Fee*

LEGO® Jedi Master Engineering

The Force is strong in this class. Build complex machines and structures based on the best designs from a galaxy far, far away. Projects include LEGO® X-Wings, AT-AT walkers, Pod Racers, Star Destroyers, Cloud Cities, settlements, and fortresses. Play-Well's Jedi instructors reinforce key engineering concepts such as gear trains, worm drives, pneumatics, eccentric motion and more as students tap into the powerful forces of imagination and engineering.

Mad Science: Science Mysteries

Mad Science explores mysteries of earth, space, sports, secret codes, and the animal world. As young astronauts, we will explore the mysteries of the solar system and learn how astronauts live and work in space. Use Morse code, and much more, to end secret messages to your friends. We'll learn the basics about water pollution, acid rain, and the benefits of solar energy. Get in touch with nature by recycling your own garbage and making your very own paper to take home. Learn about animal tracks. Discover the relationships between science and sports, including what football players, scientists, and ballet dancers, have in common. Daily topics listed include Space Day; Mad Messages; Nature; Earth Awareness; Science of Sport. PLEASE NOTE: For 2017, this is a 3-day week due to the July 4th holiday. NO CAMP MONDAY AND TUESDAY.

MathTree: Bean Counting

Let MathTree prepare your child for 1st and 2nd grades! – Young campers have fun while learning at MathTree camp at LCDS! Rising 1st graders will use beans and proprietary MathTree templates to develop counting, place value, the naming of numbers, addition with a focus on numbers that add to 10, and addition facts. Campers explore patterns and sorting and stories involving math. Rising 2nd grade campers solidify their understanding of the concept of place value and apply it to addition and subtraction, with and without regrouping, using proprietary MathTree templates. They explore patterns and sorting and children's stories involving math. This is a two-week camp. To create a full day, add MathTree's Hands-On Math for a fun application of math principles! For more information, visit www.mathtree.com.

EventCd	Teacher	StartDate	EndDate	Ages	StartTime	EndTime	Fee*
SC17.08.09.A-MT-Bean.1-2	MathTree, Staff	7/31/2017	8/11/2017	6yr-8yr-	09:00 AM	12:00 PM	\$395.00

MathTree: Hands-On Math!

In MathTree's Hands-On Math camp, campers are challenged to use math and critical thinking to complete a new task. Each task is designed to give campers an opportunity to use the math they know to solve complex, real-world challenges. Younger campers may be challenged to find ways to measure a soccer field, while older campers create a way to make a pencil float! These activities are designed as fun applications of learning to complement MathTree's academic camps listed below. This is a two-week camp. MathTree Hands-On Math camp is open to campers who desire a full-day math experience. To create a full day, select and register your child in the MathTree camp corresponding to your child's level and in Hands-On Math for the other portion of the day: AM: Bean Counting (rising 1st and 2nd) AM: Multiplication Matters (rising 3rd) PM: MathTree Roots (rising 4th) PM: MathTree Roots to Leaves (rising 5th-7th) AM or PM: Hands-On Math Campers participating in this camp bring their packed lunch. Time is allotted between your child's academic camp and Hands-On Math to eat lunch and play. Visit our website for more information about MathTree: [MathTree Website](#)

MathTree: Multiplication Matters

Mainly for rising 3rd graders, Multiplication Matters is also appropriate for very advanced younger children as well as 4th and 5th graders who have had difficulty learning multiplication facts. Multiplication facts are the roots from which much of the rest of math grows. In this camp, children learn their facts through a variety of "tricks" with exotic names such as 6 x Even and Thumbs Up, many using hand configurations. All are deeply mathematically-based. Campers are not plagued with flashcards, but connect to the multiplication facts by creating a proportional set of fact cards that engage them physically, visually, and auditorally. Campers play plenty of math games and use manipulatives to make multiplication rock solid. This is a two-week camp. To create a full day, add on MathTree's Hands-On Math for a fun application of math principles! For more information, visit www.mathtree.com.

EventCd	Teacher	StartDate	EndDate	Ages	StartTime	EndTime	Fee*

MathTree: Roots to Leaves

In Roots to Leaves, as we affectionately call this camp, campers help Numero, the Number Wizard, rebuild the Numeratory that has been destroyed by a tornado. In doing so, they tune into their sense of number, enriching it with lively exploration into number theory topics such as odds and evens and prime numbers. Guided by the teacher in this endeavor, campers open a window into the underlying structure of mathematics. Campers also develop their skills individually as they climb the MathTree® from the Roots level up. MathTree® is a tree you want your child to climb! Using the MathTree® proprietary skill system, youngsters refresh, sharpen, and extend their repertoire of math skills. The skill curriculum customizes to each child so this camp is useful for enrichment, review, or remediation. Skills include the four basic operations plus fractions, decimals, and percents. More advanced campers develop their skills in integers, absolute value, order of operation, exponents, radicals, and complex fractions. This is a two-week camp. To create a full day, add on MathTree's Hands-On Math for a fun application of math principles! For more information, visit www.mathtree.com.

EventCd	Teacher	StartDate	EndDate	Ages	StartTime	EndTime	Fee*

MathTree: Roots

Fractions and division are the focus! Campers will conquer the concepts of fractions and division in real-life situations, with physical objects, through drawings and narrative, and, finally, with traditional symbols. Individually, campers begin their climb up the MathTree®, our proprietary skill system that customizes children's pursuit of math skills. MathTree Roots is generally for children who will be entering the 4th grade in the fall following their attendance at camp. They must have fluent knowledge of multiplication facts. This is a two-week camp. To create a full day, add on MathTree's Hands-On Math for a fun application of math principles! For more information, visit www.mathtree.com.

Minecraft / Mindcraft

Join us for a full day camp of Minecraft and Mindcraft (board games), with lots of outdoor fun and activities, too! (Creeper tag, anyone?) We will start the day sharing Minecraft tips and building new worlds on our very own server and will finish the day by playing the very best, most fun board games! NOTE: We have added a consecutive second week of Minecraft camp to enable two-weeks of uninterrupted building fun! We hope you will sign up for both weeks! All experience levels welcome. Campers should come with a computer Minecraft account already set up. The camp made server is computer only. Students are welcome to bring their own laptops to participate. Mobile Minecraft (Pocket edition) is also welcome and the students may interact with each other on that medium, however the camp will not be doing anything special in the mobile Minecraft version. Rising 3rd Grade and up.
