Introduction to Adobe Photoshop
Davide Cantoni

Material List

What to bring:

Bring a notebook and pen to take notes.

USB key or portable Hard Drive to allow you to save files (especially useful if you are using the school's computers and wish to bring files to/from home) After Effects files in particular can get quite big quickly, so the bigger the better.

If you would like to use your own Computer you must have the program applications loaded (you can buy or download a trial version at Adobe.com) and a mouse.

Wacom Tablet (pen tablet) if you have one and want to use it.

Photoshop - Bring some files/images that you are interested in working with (these could be images of your work, some of your photos etc.)
